

DoldiDollar (DOLDI) – The Currency of Bad Decisions (and brilliant ones too)

Whitepaper

1. Introduction:

DoldiDollar (DOLDI) is a utility-driven meme coin designed to celebrate both the triumphs and blunders of the crypto world. Combining humor, self-irony, and community-driven participation, DOLDI provides a platform where users can vote on and archive the best and worst moments in crypto each year, creating a comprehensive and entertaining historical record.

2. Vision and Mission:

DoldiDollar's vision is to become the go-to platform for reflecting on the ever-evolving crypto space. Our mission is to engage the community in recognizing key moments—from groundbreaking achievements to unforgettable fails—through the annual **Doldi Awards**, with \$DOLDI serving as the project's mascot and token of participation.

3. Core Concept:

DoldiDollar introduces the **Doldi Awards**, an annual event inspired by the Darwin Awards and major industry recognitions. Community members nominate and vote for categories such as *Worst Trade of the Year*, *Best Newcomer Chain*, *Biggest Rugpull*, and *Most Innovative Project*, blending humor with genuine acknowledgment of the crypto landscape's highs and lows.

4. Multi-Chain Presence:

DoldiDollar is deployed on both the **Base** and **Solana** blockchains, utilizing Pump.fun on Solana to reach a broader community. This dual presence enhances accessibility, liquidity, and engagement across two vibrant ecosystems, ensuring that \$DOLDI gains maximum exposure and adoption.

5. Key Features:

- **Doldi Awards Platform:** Community-driven voting system to highlight iconic crypto moments.
- **Multiple Categories:** Covering both failures and successes in the industry.
- **Historical Archive:** A continuously updated record of notable crypto events.

- **Community Involvement:** Encouraging participation through social media, Telegram, and Discord.
- **Mascot and Branding:** \$DOLDI as the official mascot, reinforcing brand identity and user engagement.

6. Smart Contract Overview:

\$DOLDI operates on the Base and Solana blockchains using secure ERC20 and SPL contracts, ensuring safe transactions, community interaction, and transparent management of project resources.

7. Tokenomics:

DoldiDollar has different tokenomics for each chain:

- **Base Chain:**
 - Total Supply: 420,000,000,000 DOLDI
 - Allocation: 85% liquidity/project use, 10% team, 5% platform operations
- **Solana (via Pump.fun)**

8. Roadmap:

- **Phase 1:** Smart contract deployment on Base, liquidity provision, and initial automation bots.
- **Phase 2:** Website launch, whitepaper publication
- **Phase 3:** Implementation of **OG Role verification**, allowing early holders to claim exclusive benefits. **Purchase of the Enhanced Token Package on DexScreener.**
- Phase 4: Community building
- **Phase 5:** Release of the **pre-alpha voting platform**, allowing users to vote daily on Bull/Bear market sentiment and track trends.
- **Phase 6:** Listings on CoinMarketCap, CoinGecko, and DEX platforms.
- **Phase 7:** Official **Doldi Award nomination, voting, and annual award ceremony.**

9. Governance Model:

Managed by the core team with community feedback integrated through regular polls and discussions, ensuring clear direction without unnecessary complexity.

10. Future Plans:

Expanding the Doldi Awards with more categories, forming collaborations with crypto influencers, and building a fully functional archive of past winners. Long-term goals include deeper cross-chain integration, larger community events, and innovative platform features.

11. Conclusion:

DoldiDollar merges humor with history, creating a space where the crypto community can laugh, reflect, and celebrate its journey. \$DOLDI is not just a meme coin; it's a platform that captures the essence of the blockchain world's unpredictability across multiple chains.

Disclaimer:

DoldiDollar is an entertainment-focused project and should not be considered a financial investment tool.
